Title New Guinea periodical index, 1968-

Compiler New Guinea Collection, University of Papua
New Guinea Library.

Frequency Annual.

Scope The New Guinea periodical index aims to bring
together in one publication, all articles published
about any aspect of New Guinea anywhere in the
world, as far as can be traced. ("New Guinea" in
this instance refers to the whole island of New
Guinea and thus the index includes Irian Jaya as
well as all the areas which make up the political
unit of Papua New Guinea.) There are also included
some articles about Melanesia in general, which
geographically extends from Irian Jaya to New
Caledonia and Fiji, if they appear relevant to
New Guinea. Theoretical articles which use New
Guinea cultures as examples, have also been included.

Contents Each volume includes periodical articles published
during that particular calendar year or articles
which were identified too late to be included in
the previous year.

Arrangement and Indexes Subjects and authors (if known) are arranged in
one alphabetical sequence.

A list of periodicals indexed and the abbreviation
used is given. Those which have only had an
occasional item indexed have been marked with
an asterisk.

Cataloguing Anglo-American cataloging rules (North
American text), 1967. Subject headings used in the

dictionary catalogs of the Library of Congress
has been used as a guide, but there has been
some modification of subject headings away
from normal library practice. These modifi-
cations are given in the introduction to Vol. 7
1974.

SEYCHELLES

Title	<u>Central Western Indian Ocean bibliography.</u>
Compiler	A. J. Peters and G. F. Lionnet for <u>Atoll research bulletin</u> , No. 165.
Frequency	Published in May 1973 -, no supplements to date.
Scope	Includes mainly scientific works, written about Seychelles, the Chagos and Agalega and the surrounding seas by both Seychellois and non-Seychellois. The listed works have been published both in Seychelles and abroad.
Contents	Books, official publications and reports, articles in periodicals. Manuscripts and archivalia are excluded.
Arrangement and Indexes	By alphabetical order of author in chronological order. The index is divided in two parts: (a) Index by subject matter in alphabetical order. (b) Index by alphabetical order of author.
Cataloguing	Gives author, title, periodical or place, publisher, date.
Notes	The order of arrangement of authors' names and the plan of each item are based on recommendations in the British Standards Institution's <u>Bibliographical references</u> (B.S. 1629:1950) (London, BSI, 1951). Thus the year placed immediately after the author's name is the year of issue, or priority, not necessarily the year appearing on the title page of the printed publication. By "year of issue or priority" is meant the year in which the work was actually communicated or appeared, or as near to that as is known. For example, it might be the year in which a paper

was read at a meeting, or received by the editor of a journal, as distinct from the year on the title page of the final published report; or the year in which a manuscript was actually written, as distinct from the year in which a chronicler later published it. Usually the issue and publication dates are the same; but, if different, the latter is given later in the item.

The items are set out as in Milliman, 1965.

Abbreviations and contractions of titles of serials are as recommended in World list of Scientific Periodicals (4th edition), 1963 - 1965. If the title is not in the List, the same rules are used.

Items are in the same language as that of the title given, unless otherwise annotated. Where the title has been translated into English, the source of the translation is indicated. Ref. page 3, Notes. Atoll research bulletin, No. 165.
